

# CASTLE VENTURE DATA SECURITY HEALTH MAP

## Description:

We want to protect our data in doing so we first need to know how secure is our data?. Using the DSHM we can answer the question about each of the components along a scoring vector. In version 1 we manually enter the scoring for each vector for each component. Then we would aggregate them to come up with a composite score of the data

**How secure is my  
data ?**

---

**What can I do to :**

---

**Reengineer my  
business process  
to reduce my  
exposure**

---

**Protect my  
critical data**

---

**Monitor and audit  
access to my data**

## TEAM MEMBERS:

Joel Ulahanna  
(Project Manager)

Varun Shah  
(Middleware programmer)

Aditya Gumastedesai  
(Front-End programmer)

Viral Patel  
(Back-End programmer)
